

Talem3 Accessibility Conformance Report

WCAG Edition

(Based on VPAT® Version 2.5)

Name of Product/Version: Learning Space Profiles+ with Default Theme v1.0.5

Report Date: September 2025

Product Description: Learning Space Profiles+ (LSP+) is a user-friendly platform designed to enhance classroom experiences. LSP+ transforms technical data into accessible, pedagogy-focused insights while offering 24/7 training resources, moderated feedback, and classroom ratings—all in one intuitive interface. Customization of LSP+ allows tailoring the layout and information displayed to align with the institution's needs and priorities.

Contact Information: info@talem3.com

Notes: We have evaluated LSP+ for conformance with WCAG 2.2 Level AA using its default theme and content. The platform's built-in components and features are designed and developed to be fully accessible.

We recognize that institutions can configure and customize LSP+ to meet their specific needs. This includes changing colors, modifying fonts, themes, and adding user-generated content. These customizations may impact the product's overall accessibility.

For guidance, best practices and recommendations, please refer to the Accessibility section in the LSP+ documentation. Talem3 technical support is available to assist institutions with accessibility questions related to their customizations.

Separate VPAT/ACR covers the Learning Space Manager (LSM), including the LSP+ Theme Editor.

Evaluation Methods Used: The W3C Website Accessibility Conformance Evaluation Methodology (WCAG-EM) was followed for conducting the accessibility product review. LSP+ testing involved a combination of manual accessibility testing, automated accessibility tools, and testing with assistive technology across multiple desktop platforms and browsers. The assessment included:

- Automated Testing: LSP+ web pages scanned using axe-core 4.10, WAVE Evaluation Tool 3.2.7.2, and Google Lighthouse to identify and flag common accessibility issues like missing alt text, insufficient color contrast, invalid ARIA attributes.
- Manual Code Review: Key user flows and components were manually inspected to verify semantic HTML, correct heading structures, and proper form labeling. Accessibility Insights for Web 2.46.0 by Microsoft provided step by step instructions for manual and assisted tests covering many WCAG Level AA criteria.
- Assistive Technology (AT) Testing: The product was tested with a representative sample of assistive technologies, including the NVDA screen reader 2025.1 on Windows 11 with Edge and Chrome, VoiceOver on macOS 15.6 with Safari, Firefox, Chrome, and TalkBack on Android 16.
- Keyboard-Only Testing: All interactive elements and navigation paths were tested using only a keyboard to ensure full operability for users who cannot use a mouse.
- Testing with magnification tools at 200% and 400%
